

Niraj Kumar Dangi

Full-Stack & AI Developer | Built RAG Systems & Computer Vision Applications
Next.js, React, Node.js, PostgreSQL, MongoDB | AWS, Docker

Ranchi, Jharkhand, India | +91-882-522-4435 | nirajkrdangi@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Full-Stack & AI Developer with hands-on experience building RAG systems and computer-vision applications. Work includes a local knowledge assistant and image-validation workflows using ChromaDB, local embeddings, Ollama, YOLO, FastAPI, and Next.js. Technology Intern at 366Pi Technologies (Jun–Jul 2026); pursuing an MCA with expected completion in Nov 2026.

SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, Python, SQL, Java (Basics), C++ (Basics)
Frontend: React.js, Redux Toolkit, React Router DOM, Next.js, Tailwind CSS, Framer Motion
Backend: Node.js, Express.js, FastAPI, REST API design, JWT authentication, Bcrypt
Data & AI: MongoDB, Mongoose, MySQL, Firebase Firestore, ChromaDB, RAG, local embeddings, Ollama, YOLO
Tools & Cloud: Git, GitHub, AWS EC2, Netlify, Vercel, Postman, VS Code

EXPERIENCE

Technology Intern Jun 2026–Jul 2026 · 2 mos
366Pi Technologies · Internship · Ranchi, Jharkhand, India · On-site

- Built an AI Knowledge Assistant using RAG, ChromaDB, local embeddings, and Ollama-based LLMs.
- Developed PDF, DOCX, Markdown, CSV, and TXT ingestion pipelines; implemented semantic search, vector retrieval, citation-based responses, and exportable reports.
- Contributed to an AI-powered Tree Detection & Localization System using YOLO-based computer vision; built image-validation workflows for quality checks, object detection, localization, segmentation, and metadata generation.
- Worked with FastAPI, Next.js, vector databases, embeddings, and AI application development.

SELECTED PROJECTS

Tree Detection — 366Pi Internship Contribution My fork | 366Pi original

- Contributed to YOLO-based tree detection and localization at 366Pi Technologies.
- Built image-validation workflows for quality checks, object detection, localization, segmentation, and metadata generation.

RAG — AI Knowledge Assistant GitHub

- Local assistant with PDF, DOCX, Markdown, CSV, and TXT ingestion using ChromaDB, local embeddings, and Ollama.
- Implemented semantic retrieval, citation-based answers, and exportable reports with FastAPI and Next.js.

DevTinder — Developer Matchmaking Backend | Frontend scaffold

- In-progress Node.js/Express learning project; the backend lists authentication, developer profiles, matching, and REST APIs as planned features.
- The frontend repository is a React/Vite scaffold; description is limited to functionality documented by the public repositories.

WriteNova — AI Writing Product GitHub

- AI writing product; the repository documents Gemini generation, account flows, saved history, credit-aware usage, and subscription billing workflows.
- Documented stack includes Next.js, Node.js, Express, MongoDB, Gemini, and Stripe.

EDUCATION

Master of Computer Applications (MCA) Sep 2024–Expected Nov 2026
Doranda College, Ranchi University

Bachelor of Science, Computer Science Aug 2021–Oct 2024 | CGPA: 8.12
Ranchi University, Ranchi

Academic focus: computer-science fundamentals; self-directed learning in JavaScript and modern web technologies; MERN/full-stack applications, REST APIs, and beginning AI integration with OpenAI. Activities included personal projects, GitHub collaboration, and problem-solving.

Final-year project: FeedAid — Food Donation & Distribution Platform, addressing food waste and hunger. [GitHub](#)
